

Part 3 Appendix (attach screenshots and/or line-by-line comparison below)

Please attach **the most relevant** interactions with AI in each category if it applies and provide explanations of how you use the information generated by AI in writing. You may write explanations in **Chinese**.

(The following examples are for your reference. In your own statement, please use your own screenshots and explanations to replace the examples below. You may use Chinese to explain how you have used the content in the screenshots in your writing).

1. Brainstorming

 **You**

I need to write an argumentative research paper and I'm interested in food and some emerging technologies. Would you please help to provide some ideas for brainstorming? Thanks!

ChatGPT

Certainly! Here are some ideas that combine the themes of food and emerging technologies for your argumentative research paper:

1. **Blockchain for Food Traceability:**
 - Explore how blockchain technology can enhance traceability in the food supply chain, reducing fraud and ensuring the authenticity of food products.
2. **AI-Powered Personalized Nutrition:**
 - Discuss the potential benefits and challenges of using artificial intelligence to analyze individuals' health data and provide personalized nutrition recommendations.
3. **Drones in Precision Agriculture:**
 - Argue for the use of drones equipped with sensors and cameras in precision agriculture, improving crop monitoring, yield prediction, and resource management.
4. **Lab-Grown Meat as a Sustainable Alternative:**
 - Assess the environmental and ethical implications of lab-grown meat production as an emerging technology offering a more sustainable alternative to traditional livestock farming.

Explanation: I'm interested in food and some emerging technologies, so I ask ChatGPT for some ideas. When I read the idea about lab-grown meat, I remember I have read an article about artificial

meat before. I find that people may use “lab-grown meat” interchangeably with “artificial meat.” Then I decide to reread the paper about artificial meat and do more research about this topic.

2. Generating a research question

 **You**

I need to write an argumentative research paper and I'm interested in artificial meat. Can you provide some research questions? Thanks

 **ChatGPT**

Certainly! Here are some research questions that you can consider for your argumentative research paper on artificial meat:

1. **Environmental Impact:**

- How does the environmental impact of artificial meat production compare to traditional livestock farming?
- Can artificial meat significantly contribute to reducing greenhouse gas emissions and other environmental concerns associated with conventional meat production?

2. **Nutritional Aspects:**

- What are the nutritional differences between artificial meat and conventional meat?
- How can artificial meat be optimized to meet or exceed the nutritional value of traditional meat?

3. **Consumer Acceptance:**

- What factors influence consumer acceptance or resistance to artificial meat?
- How can marketing strategies and educational campaigns be employed to enhance public perception and accept ↓ :?

Explanation: I am interested in artificial meat and ask the possible research questions related to it. Based on the response given by ChatGPT, I decide to write about consumer acceptance, making research on whether artificial meat can replace conventional meat.

3. Outline help

You

I'm writing an argumentative research paper about whether artificial meat may replace conventional meat. After doing research, I have found two reasons that support why artificial meat may replace conventional meat. First, artificial meat is more environmentally friendly. Second, artificial meat has benefits in nutrition and food safety. Meanwhile, people may doubt whether artificial meat will be accepted by consumers. Based on what I have studied, would you please produce an outline for my further writing ? Thanks!

ChatGPT

Certainly! Here's an outline for your argumentative research paper on whether artificial meat may replace conventional meat:

I. Introduction

- Briefly introduce the concept of artificial meat and its emergence as an alternative to conventional meat.
- Present the main thesis: "Artificial meat has the potential to replace conventional meat due to its environmental sustainability, nutritional benefits, and improved food safety."

II. Environmental Sustainability

A. Overview of Environmental Issues in Conventional Meat Production

1. Discuss the environmental impact of conventional livestock farming.
2. Highlight concerns such as deforestation, water usage, and greenhouse gas emissions.

B. Environmental Benefits of Artificial Meat

1. Explore how artificial meat production addresses environmental issues.
2. Discuss studies or evidence supporting the reduced ecological footprint of artificial meat.

C. Argument: "Artificial meat is more environmentally friendly than conventional meat."

III. Nutritional Benefits and Food Safety

A. Nutritional Content of Artificial Meat

1. Examine the nutritional composition of artificial meat.
2. Compare the nutritional value of artificial meat to conventional meat.

B. Food Safety in Artificial Meat Production

1. Discuss the reduced risk of contamination and foodborne illnesses in artificial meat.
2. Highlight advancements in technology ensuring the safety of artificial meat.

C. Argument: "Artificial meat offers benefits in nutrition and improved food safety compared to conventional meat."

IV. Consumer Acceptance

A. Psychological Barriers

1. Explore cultural and psychological factors influencing consumer perceptions.
2. Discuss potential resistance to accepting artificial meat as a mainstream food source.

B. Addressing Consumer Concerns

1. Present strategies to address consumer skepticism.
2. Highlight successful case studies or initiatives promoting consumer acceptance.

C. Counterargument: "Consumer acceptance may present a significant challenge to the widespread adoption of artificial meat."

V. Conclusion

- Summarize the main arguments supporting the potential replacement of conventional meat by artificial meat.
- Acknowledge the challenges, particularly in terms of consumer acceptance.
- Emphasize the need for ongoing research, technological advancements, and public awareness to facilitate the transition.

VI. Recommendations for Future Research

- Suggest areas for future research and development to address existing challenges.
- Encourage continued exploration of consumer attitudes and preferences.

This outline should provide a structured framework for your argumentative research paper. Make sure to support each section with relevant evidence and examples to strengthen your arguments.

Explanation: After reading some articles related to my research topic, I find a few reasons why artificial meat tends to replace conventional meat. After I give my reasons to support my idea, the ChatGPT provides a very detailed outline, which is useful for framing my structure in writing. I find the counterargument mentioned by ChatGPT is most useful for my writing the counterargument paragraph. I do research about strategies to address consumer skepticism and find people are more likely to accept artificial meat if they are informed about the environmental and health benefits of it (Benny et al., 2022).

4. Language/grammar/spelling/punctuation/mechanics help

1) Language help

 You

"It is not correct to accuse artificial meat without not even knowing about it. The correct attitude towards it is to know more about the daily use and embrace artificial meat." I feel the two sentences are not academic enough. Any suggestions to make some changes?

 ChatGPT

Certainly, here are revised versions of your sentences with a more academic tone:

"While passing judgment on artificial meat, it is imperative to acquire a comprehensive understanding of its attributes. A prudent approach involves gaining knowledge about its regular utilization and cultivating an acceptance of artificial meat."

These versions maintain clarity while adopting a more formal and academic tone.

Explanation: I have problems writing academically, so I do ask ChatGPT for some help. However, I find the version provided by ChatGPT is too bookish, but I do find some expressions might be helpful. For example, "judgement", "a comprehensive understanding" are phrases which exactly what I intend to say. I rewrite my sentences using the two phrases. The table below shows the comparisons:

My 1 st version	Revision by ChatGPT	My 2 nd version
<i>It is not correct to accuse artificial meat without not even knowing about it. The correct attitude towards it is to know more about the daily use and future development.</i>	<i>"While passing judgment on artificial meat, it is imperative to acquire a comprehensive understanding of its attributes. A prudent approach involves gaining knowledge about its regular utilization and cultivating an acceptance of artificial meat."</i>	<i>Having a comprehensive understanding of artificial meat is essential before making a judgement. A cautious perspective should be based on more research into this topic.</i>

2) Grammar help

Untitled document

Another problems inside the Open World Games was that the world always contain some space where is "empty". That doesn't mean that it's useless since many space is well carved. But the players usually get bored in the space once the time counts.

For example, if the game takes combat as its selling point, the player wouldn't like to spend much time on crossing the desert or driving for a long time. They will break the linear style game as if people want to do is shoot guns.

6 All suggestions

inside

Correctness · Change the form of the verb ⓘ

...world always **contain** **contained** some space...

Accept

Dismiss

...

<

>

Correct word choice
where is

Wrong verb form
is

Verb problem
do is

Explanation: I find *Grammarly* is useful in detecting my grammar errors in writing.

- "Another" should be paired with a singular noun: "another problem."
- "Inside" should be replaced with "in": In not Inside the games
- The tense should be consistent using "contained" (past tense) and "where was" (past tense)
- Using "do is" incorrect because there are three verbs "do, is, shoot" in my draft. The correct way to express is "...as if people want to shoot guns."

5. Others

You

Can you provide five sources of journal articles published in recent five years that support artificial meat? Thanks!

ChatGPT

I'm unable to provide real-time access to specific sources, but I can guide you on how to find recent journal articles on artificial meat:

1. PubMed:

- Go to PubMed (<https://pubmed.ncbi.nlm.nih.gov/>).
- Use search terms like "artificial meat," "cell-based meat," or "cultured meat."
- Refine your search results by selecting a specific timeframe, such as the last five years.

2. Google Scholar:

- Visit Google Scholar (<https://scholar.google.com/>).
- Enter relevant search terms, and limit the search to recent years.
- Check for articles published in reputable journals.

3. ScienceDirect:

- Explore ScienceDirect (<https://www.sciencedirect.com/>).
- Use keywords like "artificial meat" and apply filters for the publication date.
- Look for articles from peer-reviewed journals.

4. **SpringerLink:**

- Explore SpringerLink (<https://link.springer.com/>).
- Enter relevant search terms.
- Use filters to narrow down your results to recent publications.

5. **Wiley Online Library:**

- Visit the Wiley Online Library (<https://onlinelibrary.wiley.com/>).
- Conduct a search using terms like "cell-based meat" or "cultured meat."
- Utilize filters to find articles published in the last five years.

Remember to access these databases through your institution's library resources for full access to articles. Additionally, adapt your search terms based on the specific aspects or topics related to artificial meat that you are interested in.

Explanation: I ask ChatGPT to provide some recent publications supporting artificial meat, but it fails to give any specific answers. However, the databases provided by ChatGPT are useful. For example, I get access to Wiley Online Library using SUSTech's online library and find it's very helpful to find the relevant articles. For example, the three articles (Bekker et al., 2017; Benny et al., 2022; Tuomisto & Teixeira, 2011) are found in Wiley.
