

EAP Guidelines on Generative AI Tools

In addition to the CLE’s preliminary policy on generative AI tools, the EAP course has more detailed guidance on the appropriate use of AI in the course specifically, if it happens. Since EAP aims to cultivate your critical thinking and writing skills, you are expected to demonstrate your intellectual efforts independently and collaboratively with your peers. If AI is appropriately used, EAP instructors believe it can be your powerful learning assistant and our supportive teaching assistant. However, it should never simply substitute your own efforts and contributions to the course learning.

Generative AI is quite new and developing rapidly, so EAP instructors would like to stay open-minded while exploring how AI can be appropriately and productively used with all of you. You are encouraged to share your experience and ideas of how AI can empower your EAP learning. If you have any questions or suggestions, please talk to your EAP instructor.

Currently, the EAP guidelines on AI consists of the following two sections about group presentation and writing. To provide clear guidelines on how generative AI tools can appropriately be used throughout the course, two lists of dos and don’ts are also delineated below. Any actions listed in the “don’ts” category are considered as violations of academic integrity, and thus, should never be risked.

I. Group Presentation

Dos	Don’ts
• Use AI tools to generate and refine ideas, topics, and structure arguments for presentations • Use AI tools for editing manuscripts (e.g. grammar, spelling) • Cite AI tools in PowerPoint slides if any material generated by AI is used (see the citation example in CLE’s AI policy)	• Submit an AI-generated outline as a group presentation outline • Use any examples/statistics/quotations produced by AI without further research • Use an AI-generated manuscript for your presentation

II. Writing

1. To promote transparency, an AI disclosure statement^❶ is required at the end of your finalized paper. An independent attachment of the statement will be provided with your final assignment instruction.

AI Disclosure Statement

I did not use generative AI tools in creating this paper. ☐

or

I did use generative AI tools in creating this paper, namely _____ (*ChatGPT, Grammarly, Google Translate, etc.*).
used it in the following ways (check which of the following acceptable uses were utilized):

- Brainstorming ☐
- Generating ideas/topics/research questions ☐
- Outlining help ☐
- Grammar/spelling/punctuation/mechanics help ☐
- Others ☐ (Please be specific):

and

I affirm I did not generate text with artificial intelligence and directly copy it into my paper. ☐

2. If you state that any generative AI tools were used in the statement above, you need to add an appendix^❷ showing:
 - 1) Interaction with AI: You may use screenshots of the prompts and the queries using AI and highlight the most relevant sections.
 - 2) A description of which AI tools were used (e.g. *ChatGPT, Google translate, Grammarly*)
 - 3) An explanation of how the AI tools were used (e.g. brainstorming research topics, developing a thesis statement, searching for writing materials, editing, and proofreading)
 - 4) An account of why the AI tools were used (e.g. to stimulate thinking, to save time, to improve accuracy)
 - 5) A brief reflection on the effectiveness of using the AI tools, explaining both the pros and cons.
3. Please note that the list of dos and don'ts for writing is **subject to update** based on your learning and our teaching experience as we further explore the use of AI.

^❶ The AI disclosure statement is adapted from the syllabus policy for AI of "First Year Writing" by Loretta Notareschi at Regis University (*Syllabi Policies for AI Generative Tools* <https://docs.google.com/document/d/1RMVwzjc1o0Mi8Blw-JUTcXv02b2WRH86vw7mi16W3U/edit>)

^❷ The appendix is adapted from the generative AI assistance (GAIA) policy of "Computing & Data Sciences" at Boston University (*Syllabi Policies for AI Generative Tools* <https://docs.google.com/document/d/1RMVwzjc1o0Mi8Blw-JUTcXv02b2WRH86vw7mi16W3U/edit>)

Generative AI Tool	Dos	Don'ts						
AI chatbots (e.g. <i>ChatGPT</i>)	• Use AI tools as smart search engines for brainstorming • Generate ideas, topics and/or research questions for writing • Cite AI tools when their responses are used as primary sources Example: APA ChatGPT citation <table><tr><td>APA format</td><td>OpenAI. (Year). <i>ChatGPT</i> (Month Day version) [Large language model]. https://chat.openai.com</td></tr><tr><td>APA reference entry</td><td>OpenAI. (2023). <i>ChatGPT</i> (Feb 13 version) [Large language model]. https://chat.openai.com</td></tr><tr><td>APA in-text citation</td><td>(OpenAI, 2023)</td></tr></table> Source: https://www.scribbr.com/ai-tools/chatgpt-citations/	APA format	OpenAI. (Year). <i>ChatGPT</i> (Month Day version) [Large language model]. https://chat.openai.com	APA reference entry	OpenAI. (2023). <i>ChatGPT</i> (Feb 13 version) [Large language model]. https://chat.openai.com	APA in-text citation	(OpenAI, 2023)	• Take AI tools (e.g. <i>ChatGPT</i>) as credible sources for writing (You may need to do further research if necessary) • Copy text generated by AI tools without proper citations
APA format	OpenAI. (Year). <i>ChatGPT</i> (Month Day version) [Large language model]. https://chat.openai.com							
APA reference entry	OpenAI. (2023). <i>ChatGPT</i> (Feb 13 version) [Large language model]. https://chat.openai.com							
APA in-text citation	(OpenAI, 2023)							
Machine/AI translation tools (e.g. <i>Youdao online dictionary</i> , <i>DeepL</i> , <i>Google translate</i>)	• Use translation tools/ online dictionaries for word definitions, example sentences, and grammar guides • Keep line-by-line comparisons and may provide some analysis as required by the instructor if any machine translation tools are used in correcting sentences Note: <i>A template of line-by-line comparisons and analysis will be provided by EAP instructors.</i>	• Use machine translation tools to translate Chinese writing and submit it entirely as English written work Note: <i>AI detectors may detect machine translated work as AI-generated work.</i>						
Grammar check software & apps (e.g. <i>Grammarly</i>)	• Keep line-by-line comparisons and may provide some analysis as required by the instructor if any writing AI assistance (e.g., <i>Grammarly</i>) is used in correcting grammar errors Note: <i>A template of line-by-line comparisons and analysis will be provided by EAP instructors.</i>	• Submit AI-assisted writing without any editing/revising tracks and/or analysis as required (e.g. <i>Grammarly</i>)
